

hansgrohe

Catalogue

At Hansgrohe, every drop counts.

"We work with passion to keep creating new, better and more efficient solutions for water. Our focus is on innovative technologies and products that increase pleasure while at the same time treating the resource water with care. We have already produced many items that have revolutionised bathing culture. This catalogue will give you an overview of our entire product range and, of course, of our latest innovations. The many awards we have received for

company management, sustainability and design confirm our claim to be creating a sensuous water experience that is equally good for mankind and the environment. Which is why, to us, every drop counts."

Our family has a passion for water.

MADE IN
GERMANY

5 YEAR
GUARANTEE

Hans Grohe was never satisfied with the existing because he knew this was the only way to create the new, the exceptional and the groundbreaking. At a time when people were first starting to think about a private bathroom and when a daily shower was still utopia, he worked on developing the first showerheads. He set new standards in the bathroom - and

far beyond the German Black Forest. Now with branches and subsidiaries in 37 countries on every continent, and with the company's products all over the world, Hansgrohe is widely recognized as one of the few global players in the sanitaryware industry. Now as then, the family-run company manufactures most of its products in Schiltach and Offenburg. This

is evidence of the company's commitment to "made in Germany" and these values are still expressed everyday in everything we do. The five year guarantee that comes with every single one of our products shows just how convinced we are of this quality.

Young Hans Grohe founded the company in 1901.

Hans Grohe with son Klaus 1937.

Klaus Grohe with his sons Philippe and Richard, 2007.

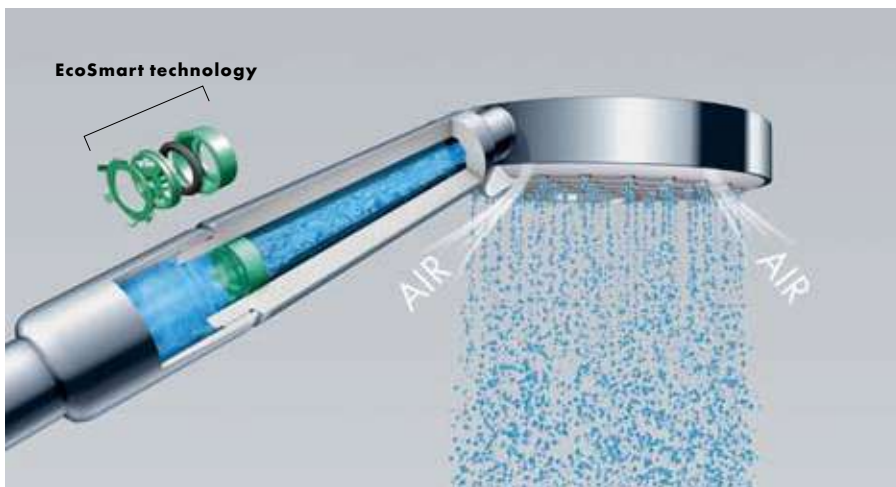

For pure water pleasure. With a clear conscience.

At Hansgrohe, the enthusiasm for water is linked with a highly developed awareness of our responsibility towards this precious resource. We are constantly working to further develop water- and energy-saving products such as EcoSmart

technology. That is one of the reasons we are one of the first companies to receive the newly created Water Efficiency Label (WELL) certificate from the European Association of Faucet Manufacturers. Our Talis, Focus and Metris basin mixers and

our Crometta 85 Green hand shower have all received Level A accreditation for the home area, the best possible result. We will continue to develop products that have a positive effect on well-being and the environment.

EcoSmart showers have a water consumption rate of just nine or six litres a minute.

Hansgrohe AG is a founder member of the German Sustainable Building Council (DGNB e.V.) and partner to the WaterSense program of the American Environmental Agency, the EPA.

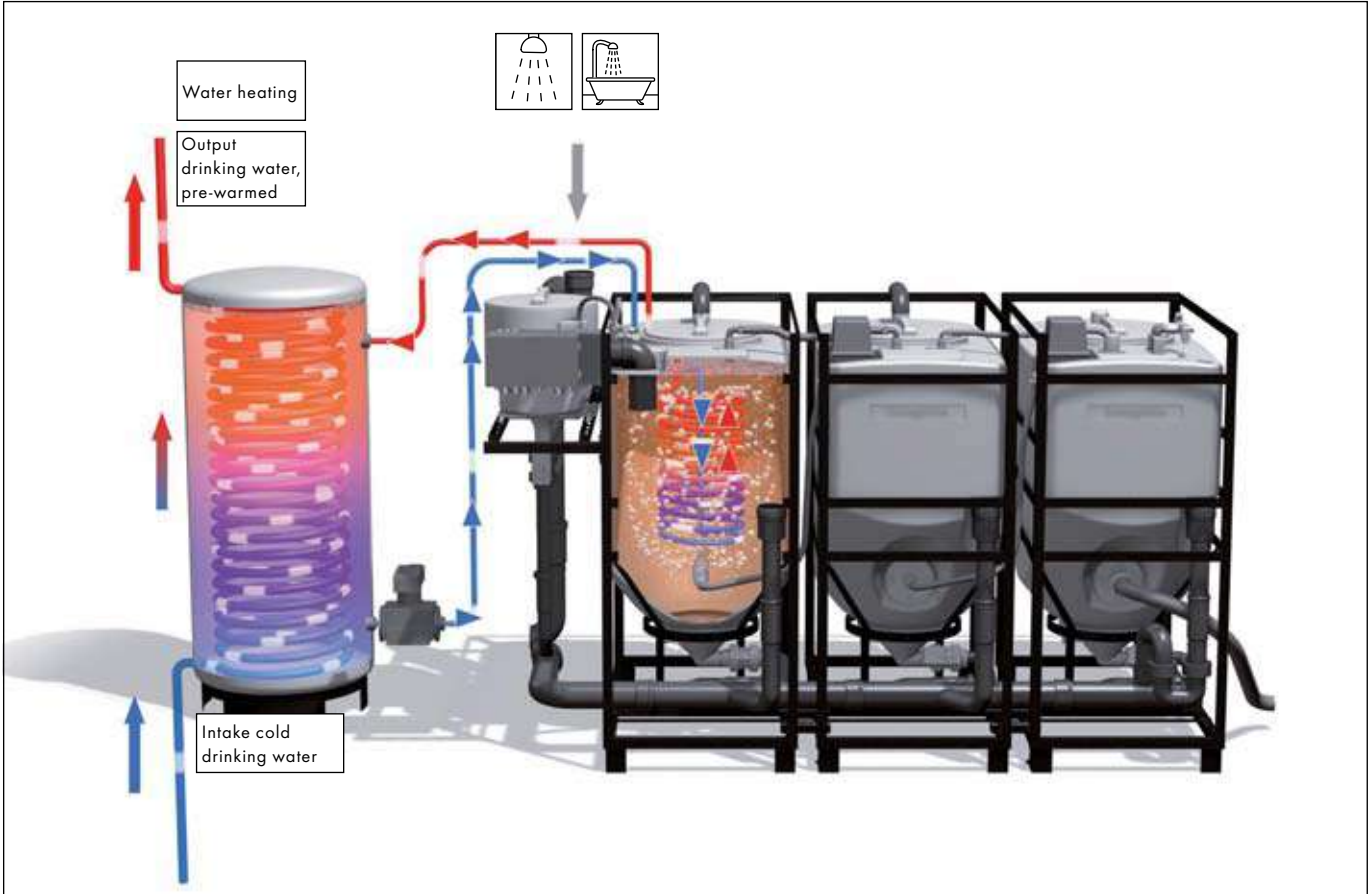

Typical Hansgrohe: Using water and heat twice.

Two other sustainability innovations by Hansgrohe: Pontos AquaCycle and Pontos HeatCycle are based on the idea of using water and heat twice. After all, half of the water we use need not be of drinkable quality. The Pontos AquaCycle cleans shower or bath water in a

biological process before then preparing it again so that it can be used a second time. This "grey" water can be used for flushing the toilet or for cleaning, or for watering the garden. If you choose the combination of both Pontos AquaCycle and Pontos HeatCycle, then the heat of

the used shower water is saved and used again to heat water – an efficient way to save energy. After all, climate care starts with hand-washing and showering and less energy consumption also means lower CO₂ emissions. And that's good for all of us.

Pontos HeatCycle technology.

Swimming pools. Thanks to Pontos AquaCycle, the water of the Yerres swimming pool in France is used a second time for gardening and cleaning the city.

Municipal sanitation. Hamburg's municipal sanitation services reuse the water from showers and basins to clean the city.

Hotels. Prague's Hotel Mosaic House is not only fitted out with various Hansgrohe products, but also runs the Pontos AquaCycle and Pontos HeatCycle.

At home all over the world.

All over the world, building clients and investors work with architects and planners to complete spectacular and refined projects. There is always a demand for smart, beautifully shaped solutions for

the use of the essential element, water. The mixers, showers, and bathroom collections from the Black Forest add a certain extra touch of design and comfort to even the best addresses: de luxe hotel and public

buildings, private homes and royal palaces, exclusive sports clubs, cruise ships and luxury yachts.

To us, perfect water pleasure also means perfectly formed.

To us, design is not a matter of taste; it is an attitude – even a passion. After all, you experience perfect water pleasure with every one of your senses. Which is why we work with international designers to come up with excellent creations. The result: with the Hansgrohe and Axor brands,

Hansgrohe AG is the award-winning, no. 1 player in the sanitaryware industry, and with over 350 national and international design awards, one of the eleven highest-winning companies in the world.

Design is never an end in itself in our daily work; rather, it is the constant

expression of the equality between form and function. The search for the smartest solution is our ultimate aim in order to create showers, mixers and comprehensive bathroom collections of exceptional quality that provide lasting pleasure, and in doing so redefine aesthetic standards.

The perfect symbiosis of efficiency and comfort.

Our aim is to create products to guarantee perfect water enjoyment with minimum consumption. In order to achieve that, and provide increasingly user-friendly solutions, we are constantly carrying out

research in the Hansgrohe spray laboratory and optimising current technology. The results are ComfortZone, XXL Performance, AirPower and QuickClean. The built-in precision module in products with EcoSmart

technology keeps their water consumption to a minimum regardless of the water pressure. And Hansgrohe quality provides lasting pleasure.

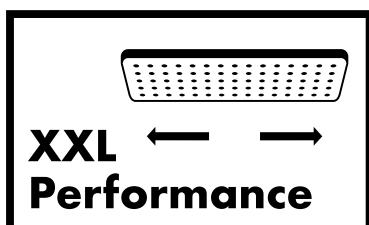

Combines water with a generous amount of air. For a soft, splash-free water jet and rich, full shower drops.

Keeps the flow to a minimum to save water and energy without any loss of performance. For lasting pleasure.

Removes limescale deposits simply by rubbing the flexible silicone nubs.

Distributes the water over the large shower disc, so your whole body is completely enveloped in well-being drops.

Defines the height between the washbasin and the spout for greater freedom of movement.

You will also find all the various technologies in a fold-out summary on the inside back page of the catalogue, so that you can always have the benefits of our innovations to hand as you look through it.

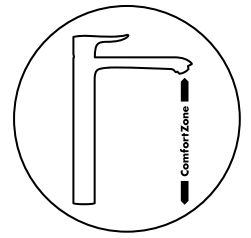

AirPower: exceptional showering pleasure and large drops thanks to the addition of generous amounts of air.

QuickClean: Showerheads remain limescale-free and fully functioning for longer simply by rubbing over the silicone nubs.

Meeting standards on every level: ComfortZone.

The height of a washbasin mixer spout determines the versatility of the uses for the basin. Whether more freedom of movement when washing your hands or

giving you options when you want to wash your hair quickly. One thing is certain: the higher the mixer, the greater the flexibility of your daily use of water. We call this

space between the mixer and the ceramic "ComfortZone". For more comfort. For more space. For every day.

Focus® 240

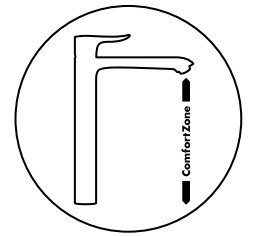

Talis® 150

Metris® 260 and Metris® 110

The perfect combination of mixer and ceramic.

Individuality means finding the right mixer height that suits your requirements and fits perfectly in the bathroom. However, it is the right ceramic choice that makes the very most of your chosen mixer. For

instance, would you prefer wall-hanging or floor mounted ceramics? We tested our mixers thoroughly in the Hansgrohe test center in combination with various ceramics to make sure they all function perfectly. This

gives you the security of knowing you can rely on our recommendations to provide you with splashfree pleasure.

Experience individual style with Avantgarde, Modern and Classic.

The bathroom has long since progressed from being a purely functional room into a comfortable living area. More and more people are creating multi-functional "well-being rooms" where design and home comforts are valued as much as

high-tech functionality. Our mixers reflect this development in the balance between perfect function and beautiful design. Avantgarde, Modern and Classic styles are authentic design lines that eschew shortlived fashions in favour of longterm styles. With

this wide range of fittings and features everyone can create their own personal well-being room. This sensuous symbiosis of discerning design and individual style is what transforms a standard into a dream bathroom.

Avantgarde.

PuraVida is particularly notable for its pure, fresh appearance and elegant lines. The DualFinish production process allows the contrasts of white and chrome to merge in

elegant harmony. The sculptured look of the mixer adds a very special touch to the bathroom.

PuraVida®

Modern.

This style speaks a clear, distinct language. There is no room here for the superfluous, for overstatement or exaggeration. The understatement of the Metris, Talis and

Focus mixer lines provides maximum scope for use. And thanks to their varying heights, they meet all your requirements.

Metris®

Talis®

Focus®

Classic.

Elegantly rounded shapes create a warm, inviting atmosphere in the bathroom. The modern interpretations of classic lines are reminiscent of bygone times, and yet have so much more to offer: from ergonomic

design and a choice of heights, to sustainable technologies which prove that good looks and intelligence need not be mutually exclusive.

Metris® Classic

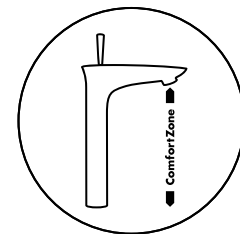

Talis® Classic

The courage to define a new shape:
Avantgarde.

Pure. Clear. Sensuous.

The **Avantgarde** style embodies purist design and pure culture. A sensuous minimalism that emphasises clarity of form and exclusivity of materials, delivering a harmonious, balanced feeling of space. The **PuraVida** line has won numerous

international awards and is a particularly aesthetic embodiment of the Avantgarde philosophy. The DualFinish process allows the surfaces of the basin mixer to blend seamlessly and makes bright chrome and pure white shine.

The art of omission: **Modern.**

Reduced. Stylish. Functional.

Modern embodies the idea of freeing oneself from everything superfluous, everything pompous and focusing on the essential. A clear design language that leaves no questions unanswered. Clear lines with sensible benefits. Every element

is questioned. The end result is a reduced, well thought through entity. As well as your personal taste, the combination of ceramic and mixer should also be considered, since it is the matching ceramic that gives the mixer the best possible visual effect and

functional performance. The Hansgrohe Configurator can help you to choose the best possible combination of the **Metris**, **Talis** and **Focus** mixer lines and wallhanging, free standing or top-mounted ceramics.

The effects develop in the interaction.

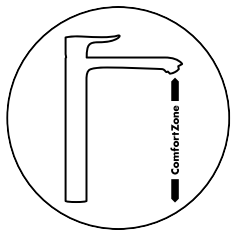

Here you will find an overview of the ComfortZone heights for the Modern style world mixers – Metris, Talis and Focus. The full benefits are realised when mixers are

combined with the appropriate basin. See for yourself just how well the individual mixers blend with various environments. We have put together a few examples to show

you how a Hansgrohe mixer can work at any height.

Beautifully shaped, to the tiniest detail.

The more minimal the environment, the more important the detail. Where clarity rules and the art of omission is perfected, every line has to be absolutely right. Bath mixers in the Modern style world set new standards in this discipline. Function meets unmistakable design.

Shower

Clear lines frame clear water.

A linear design language. Without fuss it demonstrates that nothing unnecessary has been added. A clarity reflected in every product in the Modern style. And that has one decisive advantage: every combination of the various shower elements is harmonious and appealing in its own way.

More room for individual comfort.

Temperature and water volume can be set individually with the **Ecostat Select** thermostat. There's plenty of room on the generous shelf for showering accessories and almost incidentally, the bathroom is given an exclusive look. That's because the appearance is at least as unique as the clever functional tailor-made to suit the user.

More safety.

The temperature lock protects against scalding. The elegant body is well insulated and the rounded edges minimise any bumps.

More surface.

There is plenty of room on the safety glass shelf for bottles.

More savings.

The integrated EcoSmart technology limits the water flow to ten litres per minute.

More control.

Constant water volume and temperature control with intuitive operation.

The epitome of elegance:
Classic.

Basin

Timeless. Lively. Harmonious.

The **Classic** style is the interpretation of the classic understanding of beauty into the here and now. This style combines timeless values of elegance, warmth and harmony with modern elements. The balanced shapes of **Metris Classic** and **Talis Classic** emphasise a lasting awareness of design.

Bath

Comfort that fills the room.

This style fulfils the requirement for consistency and complements it with a tasteful understanding of trends. The balanced design is also evident in the features of the bath, the soft lines converge gently, completing the image of the charmingly furnished bathroom.

Shower

Classically beautiful.

Stylistic taste and comfort need not be mutually exclusive. Quite the opposite, in fact: Classic proves that soft lines, playful little touches and links to classic showers of the last century can be given a harmonious yet modern interpretation. Here it is the classic that is developed with an eye to the future, not the nostalgic.

**The perfection of a feeling:
Shower pleasure.**

The most personal way to enjoy it.

Water can be just as it should be. Always different, yet always just right. Because "right" is different for everyone. Some like a firm massage jet; others prefer a gentle shower rain. In order to turn the

idea of individual shower pleasure into reality we develop technologies such as AirPower, which pamper the bather with full, air-enriched water drops. Or overhead showers with XXL Performance that

envelop the whole body in shoulder width water. And those who reduce their water consumption with EcoSmart create perfect shower pleasure not just for themselves, but also for the environment.

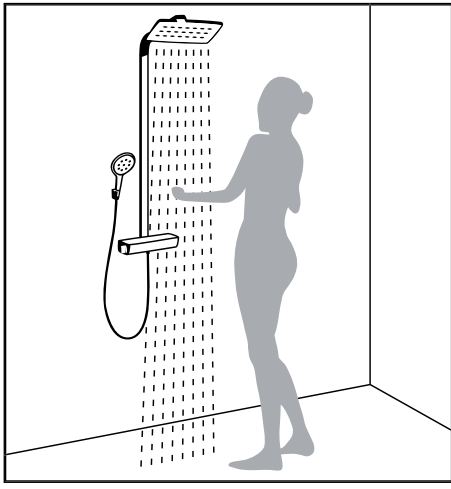

As individual as the day: Our range of showers and sprays.

We offer a wide range of showers and sprays so everyone can realise their own ideas of their perfect shower. They range from a simple shower set to an ensemble consisting of thermostat, hand and overhead showers. Up to nine spray

types provide the perfect showering experience. The installation options are equally flexible. New-builders can opt for a concealed installation. Those who want to add a new shower to an existing bathroom will probably find what they need in a more

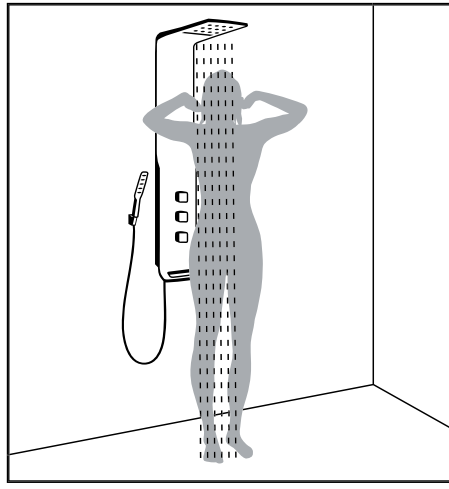

simple surface-mounted option. Whatever the requirement, whether for a new or an existing bathroom, these solutions contain the right choice for everyone.

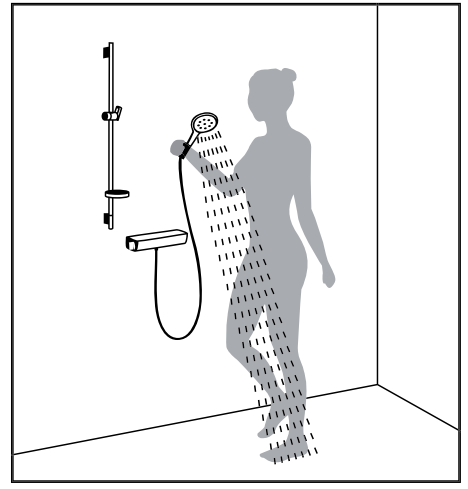

Showerpipe

Easy, concealed installation - complete renovation with minimum effort. Perfect for upgrading.

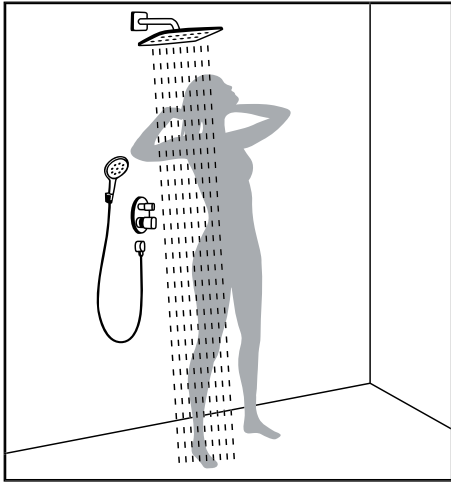

Showerpanel*

Combines overhead, hand, and side showers in a single system. The focal point in the bathroom in the exposed-mounted version.

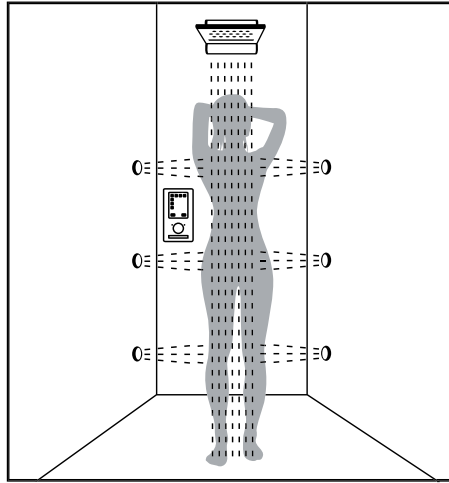

Shower set

The basic solution - offers the same full shower pleasure and is easy to mount on the wall.

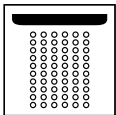

Overhead and hand shower

For refreshing or relaxing - because every day deserves a different shower. Concealed installation, integrated in the wall.

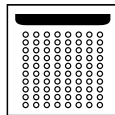

Shower family

Showering couldn't be more varied than with this concealed solution. From the waterfall to all-round pleasure.

RainAir.

This gentle shower rain with air-enriched drops will help to wash daily life from you, drop by drop.

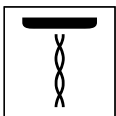

RainAir XL.

The very large shower disc envelops your whole body with soft drops.

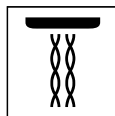

RainFlow.

A powerful surge spray that makes you feel as if you were standing on your own in a lagoon. Every day.

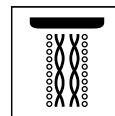

Whirl.

A concentrated spray for massaging specific parts of the body.

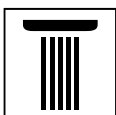

CaresseAir.

For new energy after a challenging day: The dynamic, revitalising massage spray.

Mix.

The harmonious combination of gentle shower drops and dynamic spray.

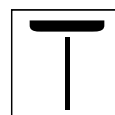

Rain.

Perfect for rinsing shampoo out of your hair.

Massage.

Strong, pulsing massage spray.

Mono.

A bundled jet for targeted, refreshing shower pleasure.

How to control showering pleasure: Hansgrohe mixers and thermostats.

Sophisticated control is the perfect finishing touch to the perfect shower. We have a wide range of control options to choose from, all based on the number of showers, the desired ease of control, aesthetic preferences and the extent of the refurbishment. Perfect shower pleasure couldn't be more controlled.

Manual control – exposed

Exposed mixers are mounted on the wall and connected to the existing water supply fittings. Recommended if only the mixer or thermostat is to be replaced in your bathroom refurbishment.

Exposed-mounted mixer – for one showerhead.

Single-lever mixer to manually control water volume and temperature.

Exposed-mounted thermostat – for one shower.

Use the left-hand control to adjust the water volume and the right-hand one to set the temperature. The thermostatic cartridge mixes to the desired temperature within seconds and then keeps it at a constant level.

Exposed-mounted thermostat – for one shower.

Ecostat Select is the shape of thermostats to come. The shelf accommodates all your shower essentials.

Manual control – concealed

With concealed mounting the body of the mixer is mounted inside the wall, so only the controls and a flat rosette are visible on the outside. Highly recommended for extensive bathroom refurbishments, and if installing two or more showerheads.

Concealed thermostat – for one shower.

An elegant solution. Use the thermostat to set the desired temperature and operate the shower at the same time using the shut-off valve.

Concealed thermostat – for two showers.

Use the thermostat to set the desired temperature and you can switch between two shower functions.

iControl® concealed thermostat with control unit – for three showers.

The temperature is set on the thermostat, use the second control unit to manually switch between three different shower functions.

Electronic control – concealed

The concealed versions of the electronic control elements are also mounted out of sight inside the wall. Recommended for a completely new bathroom which can integrate smart shower technology from the outset.

iControl® mobile concealed thermostat with control unit – for three showers.

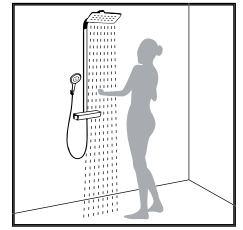

The concealed thermostat maintains the chosen temperature; adjust up to three spray types and the lighting electronically. Thanks to digital technology the control element can be removed and used as a remote control.

RainBrain® – shower electronics for even more choice.

Touchscreen control for everything – like having your own personal shower computer. Whether the shower, spray type, lighting or music from your iPod – you can control everything intuitively by touchscreen.

Perfect ensemble of overhead, hand shower and thermostat.

The interplay between sophisticated technology, perfect forms and precisely matched components can be experienced in many different ways with the various

Hansgrohe Showerpipes. Installation takes a matter of moments. Even if adding to existing wall connections - no laborious concealed installation.

Overhead shower.

Water envelops the whole body from above - for wonderful water pleasure. For a refreshing shower to wake you up, or a relaxing one in the evening.

Hand shower.

The Select button on the Raindance Select hand shower provides additional comfort. Pressing the Select button changes the spray type from RainAir via Mix to CaresseAir.

Thermostat.

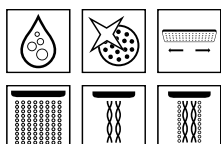

All our thermostats offer the easy-to-use control and elegant looks. The temperature and water quantity can be set individually. The Ecostat Select offers additional freedom - the level surface is a perfect shelf for shower essentials.

Showerpanel® – for variety when showering.

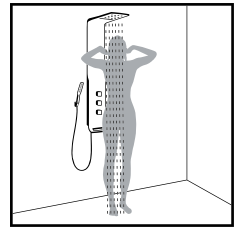

Overhead, hand and side showers; various jet types and refreshing full-body massages from the side jets: a Hansgrohe

Showerpanel brings all-round water fun. It couldn't be easier to install: simply use your existing connections for the upgrade – no

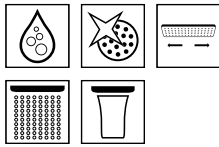

need to conceal in the wall. And you'll soon have XXL shower pleasure in your bathroom.

Comfort thanks to individualisation: shower sets.

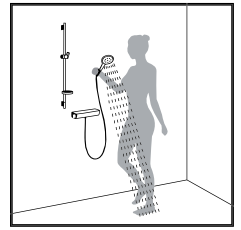

Raindance Select hand showers appeal for their looks as well as their functions. The spray type changes from RainAir, via Mix, to CaresseAir at the touch

of a button. And, especially in combination with the Ecostat Select thermostat, they make a fabulous focal point in the bathroom. The thermostat not only looks good, but

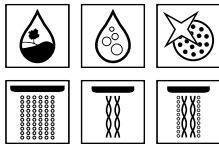

is highly functional: the increased shelf accommodates all your shower essentials.

The loveliest kind of rain: overhead showers.

People are all different and so are their preferences when it comes to the daily shower. Different shower shapes sizes and sprays meet any requirement and make every shower an individual showering experience.

Raindance® Rainmaker® Air

Raindance® E 360 Air 1jet

Raindance® E 240 Air 1jet

Made-to-measure character heads.

Whether a refreshing water jet, or perhaps drops that gently envelop the body at shoulder width, we all have our own ideas of the perfect shower. Which is why we offer a choice of shower heads with diameters ranging from 180 to 600 mm.

Clear design language.

The preferred shower can be chosen not only from various sizes, but also in different shapes.

Sprays for every desire.

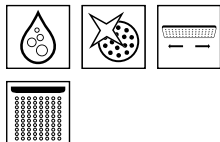

Because every day deserves a different shower, water can always be enjoyed in different ways. All our overhead showers have RainAir spray rain, which gently washes away the day's stress and tension. The Raindance E 420 provides additional water pleasure. Its strong waterfall spray RainFlow awakens new energy.

Shower in new dimensions.

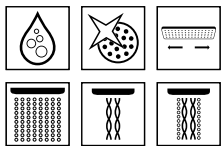

The Raindance Rainmaker – showering pleasure couldn't be bigger or more perfectly shaped: Thanks to AirPower technology the drops from the XXL spray

disc are enriched with air. And because the Raindance Rainmaker is fitted in the ceiling, instead of a traditional shower there is now a space where it rains in the most wonderful

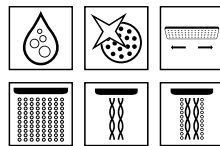

way as RainAir, RainAir XXL or Whirl and Mix, depending on the product you choose.

RainAir.
The overhead shower with AirPower technology provides luscious raindrops.

RainAir XXL.
All-over soft rain with AirPower technology.

Whirl.
The massage jets tilt to the front when the water starts.

Water with its original power.

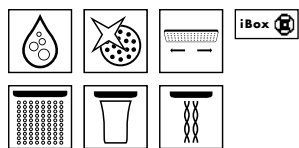

The Raindance Rainfall turns the daily shower into an entirely new experience. The horizontal rain panel provides greater freedom of movement, and adds a special accent to the bathroom. The Raindance

Rainfall 180 pampers with two different spray types: RainAir with the relaxing, voluminous drops of a summer shower, and RainFlow, whose refreshing waterfall spray provides new energy. The Raindance

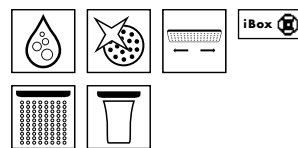

Rainfall 240 adds the option of enjoying a third jet type – the Whirl, with pleasant massage jets.

The smartest way to enjoy comfort.

RainBrain is a discreet computer that enables the user to control the shower with complete ease by Touchscreen for even greater showering pleasure – for instance, under the Raindance Rainmaker or Raindance Rainfall. From changing the spray types and adjusting the temperature in 0.5° increments, to choosing your favourite music – transmitted to the RainBrain via Bluetooth. A light touch on the control panel turns the feel-good shower into an energising, or relaxing experience.

Hidden multi talent: The iBox[®] universal.

The revolutionary concealed solution: **iBox universal**, compatible with more than 200 Hansgrohe and Axor designs and functional solutions allows the mixer body to disappear inside the wall, thereby increasing the freedom of

movement in the shower or bath. The first, and only, basic set for all Hansgrohe mixers and thermostat solutions also has another important advantage: it offers flexibility in design and system choice. If the basic body is installed at the outset, the finishing set can

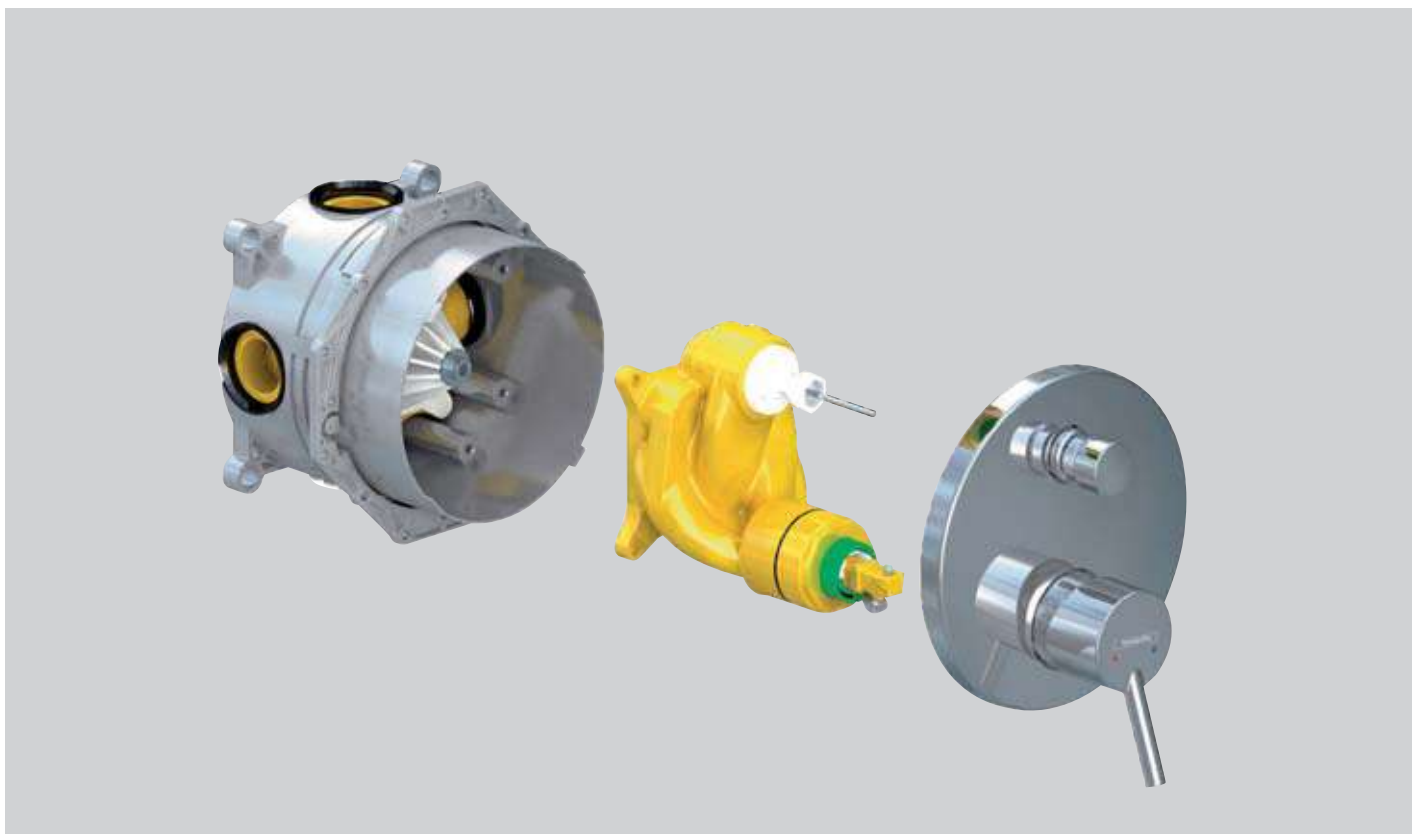

be used later to convert and upgrade. The iBox universal is also a concealed body for multi-spray overhead showers.

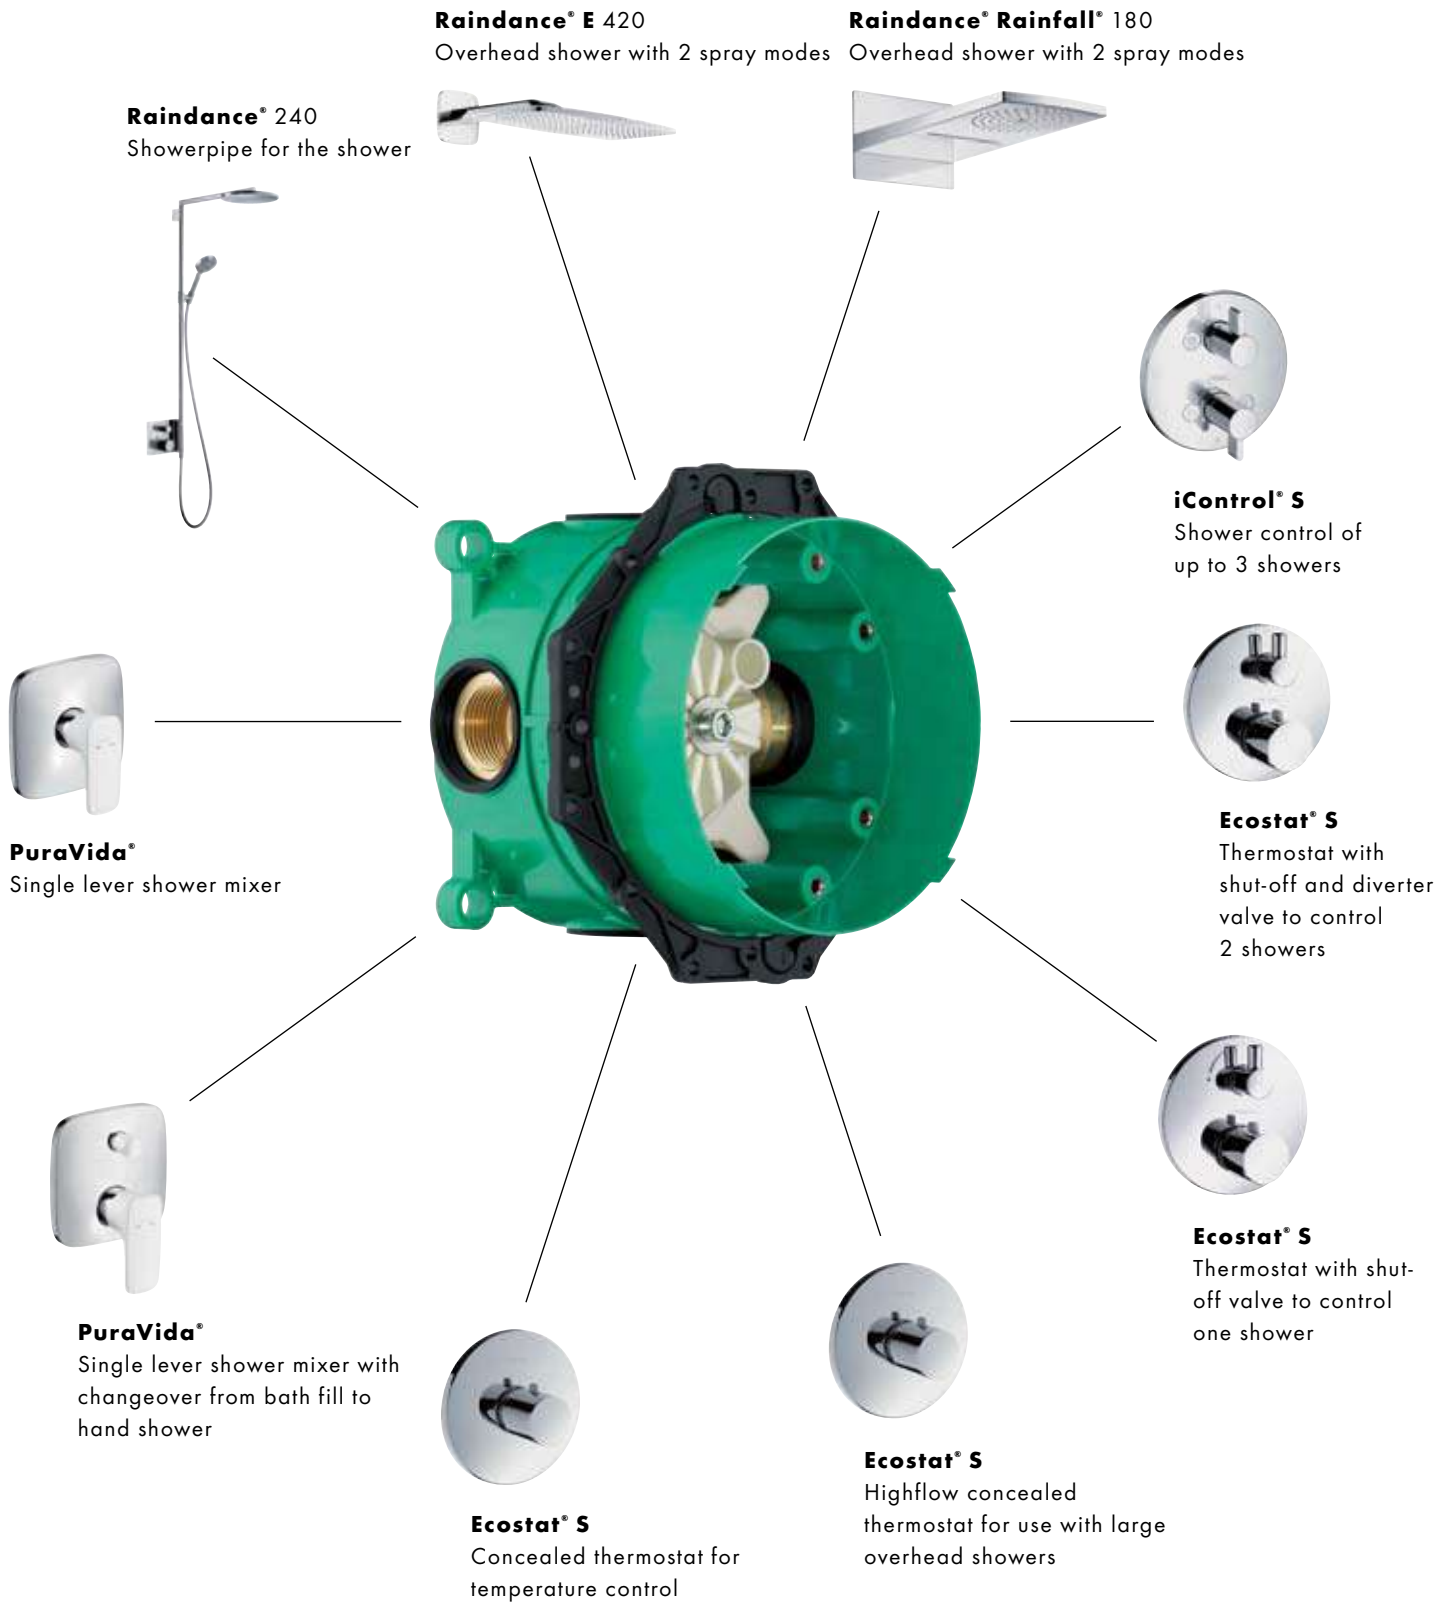

The cover rosette creates a pleasant ambience.

A practical concealed solution for added space.

Basic set for all mixer and thermostat solutions.

Elegant down to the tiniest detail: Our waste systems.

Cleanliness is essential for well-being in the bathroom. That is why Hansgrohe has developed a large number of innovative outflow systems so that used water can drain

quickly and easily. Versatile designs such as Exafill, Flexaplust, Raindrain and Flowstar are easy to install and extremely easy to use. Overflow controls and other smart

functions provide long-lasting comfort – even after the shower.

Push-Open. The Push-Open valve opens and closes at a touch, making it easy to hold the water or allow it to drain.

Flowstar*. The Flowstar pop-up fitting offers clean lines under the basin.

Bath: Exafill S. No need for a separate bath spout – the integrated fine waterfall spray is perfect for filling the bath – without splashes. Exafill S is everything in one: bath spout, drain and overflow. And it is wonderfully easy to install and to clean the inlet jets, thanks to QuickClean technology.

Flexaplust S. No risk of overfilled baths – the overflow element of the fitting controls excess water in the bath. Furthermore, the maximum safe water level for the bath can safely be increased by up to 25 mm – for even greater bathing pleasure.

Shower: Raindrain® 90 XXL. Ideal for large showers with a high flow rate, such as Raindance Rainfall and Raindance Rainmaker. For fast, easy draining of any shower tray, with a peak flow rate of up to 51 l/min and easy to install, this is the perfect shower drain.

Increasing the ComfortZone: Hansgrohe kitchen mixers

Enjoyment at its smartest.

For many people cooking is a part time that allows them to switch off and relax. In that respect, the bathroom and kitchen have a lot in common. The sensuously pure yet practical design of PuraVida supports the idea of simple smart

handling. The mixer can be combined with a lever or with an innovative electronic control. Both elements can be placed individually on the bowl - for maximum ease of use. The electronic control is a small button with a big effect. The intensity

of the water jet and the temperature are controlled simply by pressing and turning the button. You will find the matching mixers for your bathroom on page 28.

PuraVida®
2-hole Electronic kitchen mixer
Swivel spout 120°
(Shown in Stainless Steel Optic)
15805,-000,-800

PuraVida®
2-hole Single lever kitchen mixer
Swivel spout 120°
(Shown in Stainless Steel Optic)
15812,-000,-800

Pressing one, two or three times on the control unit selects one of three individually pre-defined temperatures. Turning it changes the water temperature. The water volume is changed by pressing and turning at the same time. Pressing once cancels the water in any setting.

When pressed once, the control unit lights up in blue for cold water.

When pressed twice, the control unit lights up in orange for mixed water.

When pressed three times, the control unit lights up in red for warm water.

The practical way to enjoy.

Washing up becomes a pleasure thanks to the generous swivel range and pull-out spray with two spray functions.

These mixers also prove that, far from just being a benefit in the bathroom, ComfortZone can also increase your

comfort in other areas of life. You will find the matching bath mixers from the Modern style guide on page 40.

ComfortZone. The higher the space between the mixer and bowl, the greater the freedom of movement.

Pull-out spray. Up to 50 cm more freedom of movement thanks to the flexible pull-out spray.

Spray types. The pull-out spray has two sprays: normal and shower spray.

Swivel spout. The mixer swivels by up to 150°.
