BeauLet®

Since 2011, ARCA has been committed to developing and manufacturing this electronic bidet seat, in order to create a brand new product with Japanese technology.

UPCOMING PRODUCT

MODEL: **KL - 03 - EN**

- Integrated Toilet
- Auto-Flush

Size	660*405*526mm
Wall-Flush Center	305mm
Cord	1.4m
Seat	Instant Heating
Seat Temperature	34°C~40°C
Temp. Adjustment	5 levels
Water Pressure	0.1Mpa~ 0.75Mpa
Water Temperature	34°C~40°C
Temp. Adjustment	5 levels
Dryer Temperature	41°C~53°C
Temp. Adjustment	5 levels

MODEL: **KL - 03 - EN**

UPCOMING PRODUCT

MODEL: **KL - 05 - EN**

- Integrated Toilet
- Auto-Flush
- Auto Open/Close
- Display LED Screen

Size	680*390*450mm
Wall-Flush Center	305mm
Cord	1.4m
Seat	Instant Heating
Seat Temperature	34°C~40°C
Temp. Adjustment	5 levels
Water Pressure	0.1Mpa - 0.75Mpa
Water Temperature	34°C~40°C
Temp. Adjustment	5 levels
Dryer Temperature	41°C~53°C
Temp. Adjustment	5 levels

COMPACT DESIGN

COMPATIBLE WITH VARIOUS BOWL DESIGNS

CUSTOMIZABLE COLORS

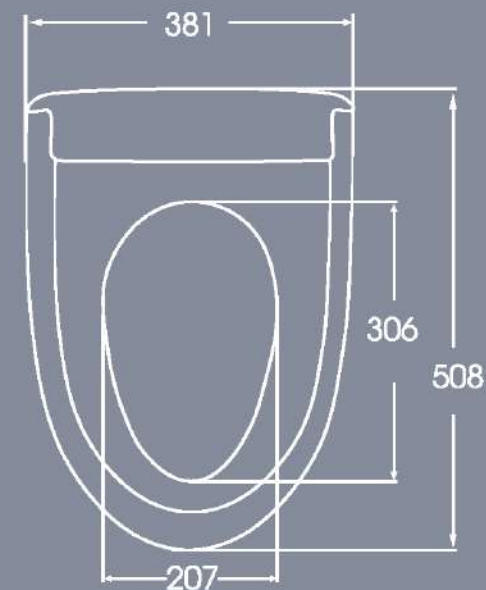

Specifications	Size	517*440*114mm	Accompanying Parts	External Filter	Eliminate impurities from water input
	Weight	3.96kg		T-shape Valve	Divide water input into water tank and BeauLet
	Power Cord	1.5m		Rubber Screw	Stabilize installation frame into BeauLet
	Model	Instant Heating		Installation Frame	Adjust position between BeauLet and toilet bowl
	Seat Temperature	33°C~39°C		Water Hose	Carry water into BeauLet
	Temperature Adjustment	4 levels			
	Water Pressure	0.05Mpa~0.75Mpa			
	Water Temperature	33°C~39°C			
	Stabilizing Frame Length	130mm~210mm			
	Dryer Temperature	32°C~62°C

Electrical Technologies of ARCA

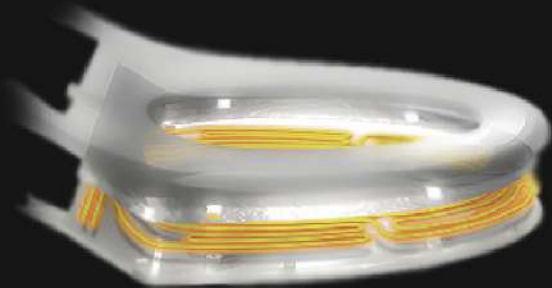

Auto Open/Close

The lid will automatically open when approached and close when user leaves.

Auto Siphon Flush

The water level is automatically adjusted after each use.
Advanced enamel technology prevents dirt accumulation.
Ensured flushing efficiency with water amount 5L/flush (1.3 gal/flush).

Seat Heating Technology

The seat will be comfortably heated, most suitable for winter use. There are 4 levels to adjust from: room temperature, 33°C, 36°C, and 39°C.

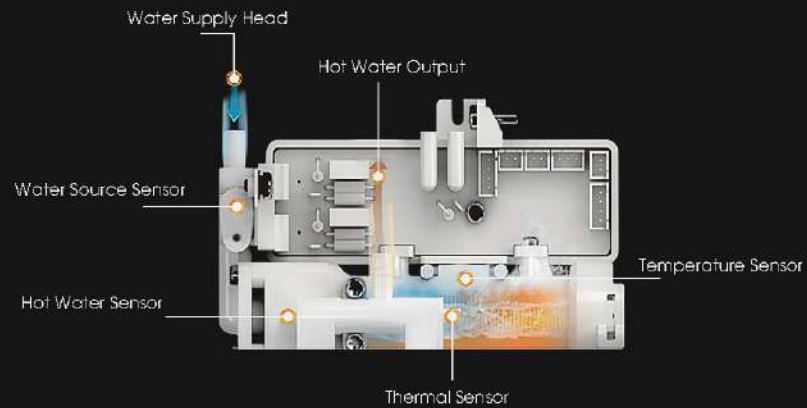

Electrical Safety System

The electrical system is IPX4 certified to prevent shock. Anti-leakage plug with auto-breaker in case of open circuit. Standard heat control, burn resistant, protective layer against overheating.

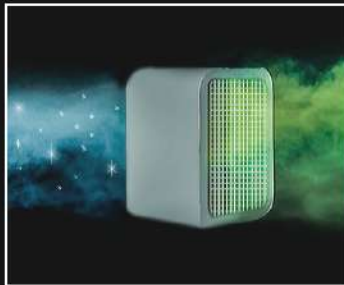

Auto Nozzle-Cleaning Technology

Nozzle will be auto-cleaned with hot water before and after every use to ensure sanitation for next use.

Instant Heating System

Heats water separately from power source, maintaining constant temperature. This direct heating technology is integrated in all of ARCA's products.

Deodorizing System

Uses an activated carbon system to sterilize and eliminate unpleasant smells.

Air Dryer System

Modern dryer system with ventilator and improved endurance. The temperature can be manually adjusted.

Separate Cleansing System

Front and rear cleanse each use a different nozzle.
Effective design shields nozzles from external bacteria.
Easy to replace.

ARCA Filtering System

Filter protects you from impurities in water that normal eyes cannot detect.
It also prevents the hose and nozzle from being jammed.

After Six Months

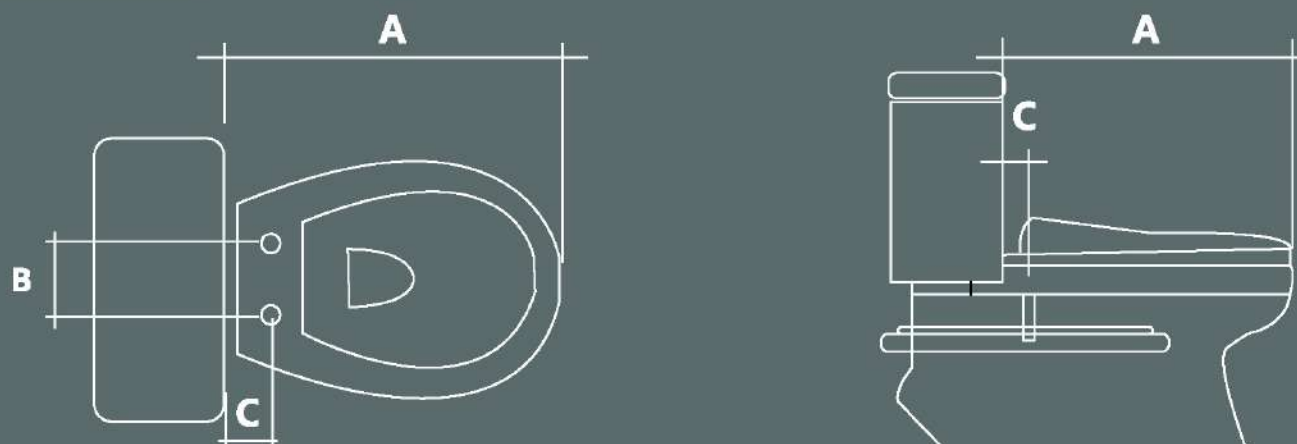

“ We recommend changing the filter every 6 months. ”

Installation Dimensions

Electronic Bidet Seat

Technical Drawings

Please check the specifications before purchasing

	Details	Size (mm)
A	Distance from end of water tank to end of bowl	$490 \leq A \leq 550$
B	Distance between installation holes	140~205
C	Distance between installation holes and water tank	≥ 20

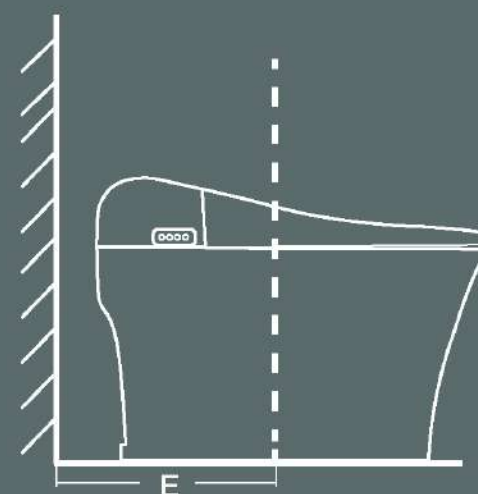

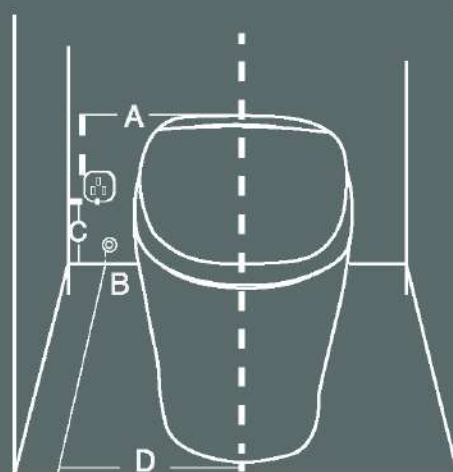

! Please do not use water input with high corrosiveness such as impure water, sea water, etc.

! Recommended water input pressure: 0.05~0.75MPa

Installation Dimensions

Integrated Toilet Bowl

Technical Drawings

Please check the specifications before purchasing

	Details	Size (mm)
A	Distance from edge of plug-in to center of bowl	≥350mm
B	Distance from water valve to ground	≥100mm
C	Distance from electric plug to ground	≥300mm
D	Distance from water valve to center of bowl	≥280mm
E	Distance from wall to flush center	305mm

! Please do not use water input with high corrosiveness such as impure water, sea water, etc.

! Recommended water input pressure: 0.05~0.75MPa
