# KOHLER® Commercial

THE BOLD LOOK
OF **KOHLER**®

Welcome. We invite you take a look at some of the innovative spaces around the world where you'll find KOHLER® commercial plumbing products. Balancing style and comfort with tough, hard-working designs, our products help today's most forward-thinking designers and architects recognize their vision. To browse our complete commercial product line or view detailed specification information, visit us at **KOHLER.com**.

# Why KOHLER?

For more than a 135 years, people have been choosing KOHLER plumbing products for their homes, their businesses, and their commercial ventures. After so many years, we're pretty sure we know why. It comes down to how we approach each product. For us, every product we design is a measure of the standards we set, in innovation, performance, quality and conservation. Every product we manufacture is evidence of our commitment to you. So year after year, we deliver incredible plumbing products for your projects.

## Innovation

Research and development is where it all begins for us – understanding our customers' needs, studying design trends and drawing on technological advances in science and industry. Our designers and engineers spend their days exploring new technologies and materials, experimenting with shape and color, and working to make each design more efficient and sustainable, more durable, more intuitive and comfortable. Only the very best make it through final design review and into the KOHLER product portfolio.

## Performance

We have built our reputation on the extraordinary performance of our products, so it's not enough to simply meet industry standards. We push performance further than our competitors by designing holistic solutions. We work not only to make each faucet and fixture the most efficient it can be, but to engineer our faucets and fixtures so they achieve peak efficiency together. All of our products, from faucets to toilets and flush valves, are put through a battery of tests developed by our engineers for durability, efficiency and consistency that go well beyond industry testing.

## Quality

We have been designing and manufacturing plumbing products of incredible quality from start to finish for over 135 years. The tools may have changed, but the craftsmanship is much the same as it was in 1873. We still hand-pour brass castings, hand-enamel cast iron baths and handcraft vitreous and fireclay products. We use only premium materials, test our product designs in our IAPMO* – certified testing lab, and inspect each product before we stamp it with the KOHLER name.

*International Association of Plumbing and Mechanical Officials

## Conservation

Our commitment to the environment isn't anything new. It began in 1913 with a 50-year plan for the green spaces of the Kohler community and has evolved into a journey toward a net zero carbon footprint and a promise to create water-saving products that never sacrifice performance or design. We have delivered on that promise, and as a result, Kohler was named the 2008 and 2009 WaterSense℠ Manufacturing Partner of the Year and received the WaterSense 2010 Excellence Award for Strategic Collaboration.

# Georgetown Brewing Company, Washington

The Georgetown Brewing Company brews some of Seattle's most requested craft beer and recently expanded its base of operation. The company's decision to purchase and renovate a larger space allowed the owners to create an environment that mirrors the company ethos – smart, current and hard-working. KOHLER® plumbing products fit right in. Using minimal amounts of water, our water-saving toilets and urinals can help Georgetown Brewing Company save thousands of gallons of water every year. Plus, the innovative technology of our Hybrid energy system paired with the adaptive infrared technology of Insight™ faucets offers long-lasting solutions that save energy and maintenance costs, savings that can be poured right back into the business of brewing up the next tasty ale.

## Flying Fish, Washington

Seattle's legendary Flying Fish restaurant has been ahead of its time since its inception 15 years ago, engaging in sustainable food sourcing before it was popular. Newly remodeled to stay relevant in the hip Belltown neighborhood, Flying Fish incorporated contemporary plumbing designs from Kohler that complement its green philosophy and its trendsetting look. And while water and energy conservation are key elements in the remodeled space, consistent, exceptional performance is just as essential. When everything runs smoothly behind the scenes, the focus can stay on creating and savoring the meals. Durable, reliable water-saving fixtures and faucets give Flying Fish the best of both worlds: conservation and performance.

# Citi Field, New York

Home of the New York Mets and a state-of-the-art ballpark, Citi Field was designed to offer baseball fans a comfortable, amenity-rich game day experience. With 646 toilets and capacity for 41,800 fans, the stadium requires tough, efficient KOHLER® plumbing products, manufactured with premium materials and built to last in even the harshest environments while reducing water use. And just how much water can Citi Field save? Even if we conservatively estimate the water savings from our fixtures and faucets to 1 gallon per person per game, over the course of 81 home games with the stadium at three-fourths capacity, Citi Field would save over 2 million gallons of water. That's equal to a lifetime of drinking water for more than 50 people.

# Eckstein Hall, Marquette University, Wisconsin

Housing Marquette University's law school, Eckstein Hall is a bold addition to the Marquette campus and already an iconic structure in the Milwaukee landscape. Like any college environment, every component of Eckstein Hall needs to be virtually impervious to unrelenting traffic. All-brass KOHLER® faucets and flush valves, and our incredibly durable fixtures will stand up to constant use semester after semester. And, with faucets powered by nearly maintenance-free, 30-year Hybrid energy systems, Eckstein Hall will be well on its way to outlasting its 86-year-old predecessor.

# 2000 Tower Oaks, Maryland

More than an office building, 2000 Tower Oaks is on the cutting edge of sustainable corporate architecture. Designed not only to be in tune with its environment but also to offer its inhabitants a balanced mind and body experience, 2000 Tower Oaks features water-saving KOHLER® fixtures to reduce its impact on the natural world. Just one of our waterless urinals can save up to 40,000 gallons of water over the course of a year, helping 2000 Tower Oaks maintain it LEED Platinum status. Additionally, our WaterSense labeled toilets always deliver outstanding performance while using 20% less water than standard 1.6-gallon toilets. The compelling architecture of 2000 Tower Oaks requires equally inspiring interior spaces. Sporting clean, modern lines, our fixtures add to the timeless nature of the entire structure.
